Dump truck feature

- . Dump truck is also called tipper and engineering truck. It is made up of auto chassis, hydraulic lifting mechanism, take power device and cargo body.
- . In the civil engineering, it is often used to joint excavator, loader, belt conveyor etc. to operate to form the production line of loading, transport and unloading. It is used for loading and unloading transportation for earthwork, sandstone and loose materials.
- . As the loading van can unload automatically by tilting the angle, it can save the unloading time and labor, shorten the delivery cycle, improve production efficiency and reduce the transportation cost, so that it is common transportation machinery to be used.

Summary

Hydraulic dumping mechanism mainly consists of pneumatic control valve, power take-off, gear pump drive shaft, gear pump, etc.

Pneumatic control lifting valve, hydraulic cylinder, hydraulic oil tank, hydraulic pipeline, limit valve and other components. The power of the engine is output from the power take-off on the transmission, and the gear pump is driven by the transmission shaft, and the hydraulic pressure is driven by the transmission shaft. The oil is pressed into the hydraulic cylinder through the gear pump, thus pushing the piston of the hydraulic cylinder to lift the carriage. The role of hydraulic oil The piston of the lower hydraulic cylinder will continue to rise. When the hydraulic system is restricted to return oil, the piston will no longer continue to rise.

At this time, the carriage is at the angle of maximum lifting angle.

Main Specification

No.	Item name	Unit	Specification/Technical parameter
1	Product name		dump truck
2	Drive type		6*4
3	Steering wheel		Left hand drive
4	Overall size	mm	8650X2500X3450
5	Gross weight	kg	25000
6	Rated payload	kg	14000
7	Curb weight	kg	10870
8	Axle		3
9	Wheelbase	mm	4325+1350
10	Max speed	Km/h	102
11	Chassis model		ZZ1257M4347D1
12	Chassis brand		HOWO
13	Chassis manufacturer		China Heavy Truck Group Ji'nan truck Limited by Share Ltd
14	Engine model		D10.28-40
15	Engine manufacturer		China heavy-duty automobile group Co., Ltd.
16	Displacement/power	ml/kw	9726/206
17	Emission		Euro IV
18	Fuel type		Diesel
19	Tyre specification/ tyre number		12.00R12
20	Gear box		9 forward gears and 1 reverse gear
21	Front / rear axle	T	16/23
22	Cabin		H76 flat top, with air conditioning.
23	Cabin allowed seats		3
24	Inner cargo van size	mm	6000/5800/5600x2300x1100/1500
25	Cargo van material		Q235 Carbon Steel
26	Cargo van thickness		Side 6mm bottom 8mm□other thicknesses are available□
27	Lift way		Front lift□Middle lift is available□
28	Dump truck is also called tipper and engineering truck.It is made up of auto chassis, hydraulic lifting mechanism,take power device and cargo body.In the civil engineering,it is often used to joint excavator, loader, belt conveyor etc. to operate to form the production line of loading,transport and unloading.It is used for loading and unloading transportation for earthwork,sandstone and loose materials.As the loading van can unload automatically by tilting the angle,it can save the unloading time and labor, shorten the delivery cycle, improve production efficiency and reduce the transportation cost,so that it is common transportation machinery to be used.		

FACTORY OVERVIEW

1. Q: How long is the warranty period?

A: All of our trucks have one year warranty or 25000KM since you get the truck.

2. Q: What's the main market of your company?

A: We have customers all over the world and our main market is Africa, all the individuals and units are my partners who have a demand of China's high quality automobile industry product.

3. Q: How much the production capacity and supply capacity of your factory for one year?

A: This depends on your needs. 10 years of spare parts sales experience makes us have a smooth supply channels.

4. Q: Where is your factory located?

A: Our company is located in Suizhou City, Hubei Province, the Capital of Special Purpose Vehicle in China. Warmly welcome to our factory.

5. Q: The reason why you chose our company?

A: We have the abundant resources supply, professional quality inspection engineers, excellent service team, we will integrate all resources for your needs, let you experience the more cost-effective and more convenient "one-stop" procurement services, effectively reduce the purchasing cost.
